

PROFESSIONAL PROFILE

EUGENE S SICKLE
STRATEGIC, MANAGEMENT AND
OPERATIONAL TRANSFORMATION
CONSULTING

Professional Statement

I am a strong thought, strategic and operational leader with proven expertise in managing a diverse portfolio of work within the educational, for-profit and not-for-profit sector in South Africa and the Eastern & Southern African region. My ability to deliver across a range of portfolios is predicated on extensive technical and operational experience. I have been instrumental in working with Training Resources Group (TRG, Arlington, USA) to develop a strategic plan for a large research institute, working to facilitate discussions with internal and external stakeholders while providing coaching and mentorship support. I have negotiated and managed a number of public-private partnerships and have leveraged these to deliver high-quality programs by successfully gearing complimentary expertise of partners in support of common objectives. My formal qualifications in Chemistry provide me with the analytical & technical insights to engage in transformative, technological innovation in diverse areas such as vaccine rollout, multipurpose technologies, mobile solutions for health and HIV self-testing. This is coupled with extensive strategy development, coaching and facilitation skills. I am a highly organised, goal-oriented individual who prides himself on being a strong leader and communicator.

Key performance areas include:

- Driving key change & transformation initiatives
- Facilitation & Coaching
- Managing strategic assets
- Optimising operational processes
- Designing a framework to implement strategy
